

My city is not currently on the weather and traffic channels, but I do not agree with the radio stations. I subscribe to the XM radio as I subscribe to the cable company. Does the radio business have issues with the cable co.? Seems to me that the TV provides weather and traffic. I do not feel that a pay service should be regulated in the sense that the radio stations feel they should be. I do not yet have a dog in this fight but I still feel that since it is a pay service (XM Radio) the radio stations should address their own issues of ways of improving not on the ways to hold others back!

Thank you for your time!!!

Sincerely, Joe Altimore III
